

In-Sight

Vision Systems

Product Guide

The Cognex Advantage

Industry Leading Performance

Since the inception of Cognex over a quarter century ago, we've recognized that the true test of a vision system is that it works under real world conditions on the factory floor. Performance is not just related to high-speed image acquisition and processing, but also to the combined power of the vision hardware and software. And that's what Cognex delivers. This assures users reliable, repeatable performance even in the most challenging vision applications. Industries from pharmaceutical to automotive to electronics rely on Cognex vision systems to ensure the end products they deliver to their customers meet the highest standards.

Exceptional Flexibility

The flexibility of the In-Sight® family of vision systems can be defined in a number of ways: processing power, resolution, vision tools, connectivity, and operator interface. Whether you are a system integrator, machine builder, or end user, In-Sight vision systems come equipped with a seamless application builder and networking environment.

Unmatched Ease-of-Use

Ease-of-use is built into the heart of In-Sight vision systems starting with smart vision tools that automatically select features, set parameters, and operate in real world conditions without adjustment. Our EasyBuilder® software interface offers everything required to easily set up reliable applications. With no programming needed, applications are deployed quickly. In addition, In-Sight offers the most comprehensive and easiest to use connectivity suite of communications capabilities to interface to PLCs, robots, the factory network and HMI devices.

Extreme Ruggedness

All In-Sight systems are self-contained, compact vision systems requiring no external processor or separate camera. In-Sight is the only family of vision systems available today that provide industrial grade features as standard. That means rugged, die-cast aluminum cases that can withstand punishment of vibration, and sealed M12 connectors and protective lens covers provide IP67 rated protection against dust and moisture. It all adds up to peace of mind on the factory floor.

A Wide Range of Models

Cognex offers the widest range of vision systems found in the industry with the In-Sight product family, which means that you can choose the correct platform for your application at the right price. All In-Sight models are powered by In-Sight Explorer software. In-Sight systems can be used for single-point inspection tasks or for building an entire factory-wide network of vision systems.

In-Sight 7000

Small, tough and very smart.

The new In-Sight 7000 vision system represents a true revolution in machine vision featuring powerful vision tools, autofocus, integrated lighting and optics, faster image capture, capability to power and control a range of external lighting and enough input/output capacity for virtually any inspection scenario—all in a compact, industrial IP67 package that makes the system ideal for more applications than ever before.

In-Sight Micro

Make it small. Make it smart. Make it easy.

In-Sight Micro is the smallest vision system series at 30mm x 30mm x 60mm. Featuring power over Ethernet (POE), these ultra-compact vision systems are the right option for integrating into small spaces. In-Sight Micro is available in a range of performance levels and tool sets to meet a diverse array of machine vision demands.

In-Sight 5000

Rugged, reliable and powerful.

In-Sight 5000 is the groundbreaking machine vision series featuring more than fifteen different model types including high speed, high resolution, color, ID, line scan and more... all in a rugged IP67 package. In-Sight 5000 is suited for industrial environments.

	Ultra High Resolution	Ultra High Performance	Ultra High FPS	Line Scan	Integrated Lighting	Smallest Profile	IP67 Rating	Autofocus	OCR Only Models	Color	ID

In-Sight Micro			•			•				•	•
In-Sight 5000	•	•		•			•			•	•

In-Sight 7000 Series

Integrated Lighting

Integrated lighting with five different color options gives users total flexibility to support any vision application.

Lenses

Five different field replaceable lens options that work with the autofocus functionality to help further customize the vision system.

Autofocus Optics

Built-in autofocus capability makes it ideal for production situations requiring regular part changes.

Housing

IP67-rated case stands up to caustic environments.

Connectors

Ethernet, power and I/O connect via the industrial M12 connectors.

Size

75mm x 55mm x 47mm, offering the most streamlined profile for In-Sight vision systems.

In-Sight 7000 Models

General Applications

Offering a range of performance choices, model options include high speed, higher resolutions and the ultimate in tool flexibility.

Models: 7020, 7050, 7200, 7400, 7402

Entry Level

The entry level vision system was developed specifically for inspection tasks where vision sensors are too limited and a standard vision system may not be cost effective.

Model: 7010

OCR

OCR models provide advanced industrial text reading capabilities.

Models: 7230, 7430, 7432

ID

ID models offer unmatched identification software tools for reading and verifying 1-D and 2-D codes.

Models: 7210, 7410, 7412

For more information on In-Sight 7000 models, please refer to page 18.

In-Sight Micro Series

Connectors

Single cable for power and Ethernet connects via the industrial M12 connector. An M8 connector provides high speed trigger and outputs.

Housing

Die-cast zinc and steel case stands up to industrial environments.

Lenses

Accepts standard CS or C-mount lens (spacer for C-mount lens included).

Size

In-Sight Micro measures only 30mm x 30 mm x 60 mm.

In-Sight Micro Models

Standard Resolution

Offering a range of performance choices, the In-Sight Micro models handle even the highest speed manufacturing lines in the smallest vision system footprint available.

Models:

1020, 1050, 1100, 1400, 1500

High Resolution

When large parts need to be inspected for small defects or precise measurements, turn to the high resolution models for greater accuracy.

Models:

1500, 1402, 1403, 1403C

Color

Includes the powerful ExtractColor software tool to inspect color features of a part and the robust MatchColor software tool to recognize parts based on their color.

Models:

1100C, 1400C, 1403C

ID

In-Sight Micro ID Readers use our unmatched identification software tools for reading and verifying 1-D and 2-D codes, and advanced OCR/OCV tools for reading and verifying text.

Models:

1110, 1410, 1412, 1413

For more information on In-Sight Micro models, please refer to page 18.

In-Sight 5000 Series

Lenses

Accepts standard C-mount lenses.

Resolution

Available in 640 x 480, and 1024 x 8192 formats.

Standard Housing

Die-cast aluminum cases are IP67 (NEMA 6) rated and have a protective lens cover.

Connectors

Ethernet, power and I/O connect via the industrial M12 connectors.

In-Sight 5000 Models

Standard Resolution

Built of rugged, die-cast aluminum, with sealed M12 connectors, and an included protective lens cover, the In-Sight 5000 Series models offer a wide array of performance choices, all with IP67 (NEMA 6) rated protection.

Models:

5100, 5400, 5600

High Resolution

When large parts need to be inspected for small defects or precise measurements, turn to the high resolution models for greater accuracy. Up to a 5 megapixel version available.

Models:

5603, 5605

Color

Includes the powerful ExtractColor tool to inspect color features of a part and the robust MatchColor tool to recognize parts based on their color.

Models:

5100C, 5400C

High-Performance

The high-performance series offers a 1GHz processor running the Cognex vision tool library at the highest speeds to keep up with the fastest production lines. The 5600 is available in standard, high-resolution, and line scan, for ultimate acquisition flexibility.

Models:

5600, 5603, 5604, 5605, 5610, 5613, 5614, 5615

Line Scan

The In-Sight line scan builds an image line-by-line, as a product moves past the system. This alternative method for acquiring images is suited to applications such as inspecting 360° around a cylindrical object, building high quality, high resolution images, and inspecting parts on a web.

Models:

5604, 5614

ID

In-Sight ID readers use our unmatched identification tools for reading and verifying 1-D and 2-D codes, and advanced OCR/OCV tools for reading and verifying text.

Models:

5110, 5410, 5610, 5613, 5614, 5615

For more information on In-Sight 5000 models, please refer to page 19.

In-Sight Fixed-Mount ID Readers

Cognex In-Sight fixed-mount ID readers provide unmatched code reading performance. These readers integrate lighting, camera, ID software, processor and communications into an industrial-grade design, making them the most versatile and rugged fixed-mount readers available today.

In-Sight ID readers incorporate IDMax®, breakthrough code-reading software based on the patented Cognex PatMax technology, through 1DMax™ and 2DMax™ algorithms. IDMax can read 1-D code symbologies such as UPC, PDF, stacked and postal codes, 2-D code symbologies such as Data Matrix and QR, or a mix of barcode and 2-D codes simultaneously.

1DMax is a best-in-class 1-D barcode-reading tool optimized for omnidirectional barcode reading and can handle extreme variations in contrast, blur, damage, voids, specularity, resolution, quiet zone violations and perspective distortion.

2DMax is optimized for reading QR codes and handles a wide range of degradations to 2-D Data Matrix code appearance that result from dramatic degradations in Direct Part Marking (DPM) code quality due to differences in material types and surfaces. 2-D Data Matrix code reading in DPM applications is an increasingly important part of manufacturing processes. An unreadable code may stop production, and can result in the part not being processed correctly.

Models

In-Sight 7000 Series:
7210, 7410, 7412

In-Sight Micro Series:
1110, 1410, 1412, 1413

In-Sight 5000 Series:
5110, 5410, 5413, 5610, 5613, 5614, 5615

Advantages

- Real-time reading of 1-D and 2-D codes at rates over 7200ppm
- Includes IDMax—the industry’s most reliable Data Matrix reading software
- Industry-standard mark quality assessment metrics for 1-D and 2-D codes
- Fast setup, plus reliable, robust operation

Fast, Reliable Code Reading

Industrial identification is very challenging due to variations in mark appearance, uncertainty of part position and high production line speeds. The combination of sensor, processor architecture and optimized ID software, allows In-Sight fixed-mount readers to meet high-speed production requirements, while maintaining accurate reading.

Factory Floor Communications

Integrating In-Sight vision systems into your existing automation control system is easy with Cognex Connect™, the most comprehensive suite of communications capabilities ever available in a vision system. Whether you're connecting In-Sight directly to a PLC or robot controller, or managing multiple In-Sight vision systems remotely from a networked PC or HMI, Cognex Connect assures seamless communication between In-Sight and all of your equipment on the factory floor.

- Cognex Connect supports open-standard protocols used by the leading PLC manufacturers including CC-Link, MELSEC protocol, POWERLINK, EtherNet/IP, PROFINET and Modbus TCP. Whether connecting to Mitsubishi, Rockwell, Siemens, or any other brand of PLC, Cognex integrates into the control system with point-and-click simplicity.
- For interfacing to robots, Cognex Connect provides pre-configured communication tools for ABB, Denso, Kawasaki, Kuka, Motoman and Staubli. Communication with Mitsubishi, Adept, Epson, IAI, Nachi, Yamaha and many other robot manufacturers is also supported.
- For interfacing to HMIs, PCs and file servers, Cognex Connect provides an OPC Server, ActiveX Display Controls, In-Sight SDK, and support for TCP/IP, FTP, SFTP, Telnet and SMTP over Ethernet.

MODBUS TCP

Modbus

ETHERNET POWERLINK

Vision Has Never Been Easier

The most powerful In-Sight vision tools are now the easiest to use and are presented more simply than ever before with the EasyBuilder interface in our In-Sight Explorer Software. This easy-to-use interface walks you through the process of setting up your vision application, step by step.

Great for first time vision users, EasyBuilder doesn't require you to learn programming, allowing you to get the application deployed and running in a very short time and enabling you to focus on what's most familiar... your part! Plus, the advanced vision tools and logic make EasyBuilder a powerful interface for the experienced vision user too!

For advanced vision users, In-Sight Explorer gives you access to the power and flexibility of the spreadsheet to allow you to program solutions for the most challenging applications.

Four simple steps guide you through the setup process.

A library of vision tools are configured with the click of a mouse.

The palette provides quick access to tool results, I/O status and built-in help.

Point-and-Click Setup Drop in tools quickly by simply clicking on the features of interest.

Name	Result
Pattern_1 (303.1,237.3)	-21.1° score.
Circle_2	Present
TopDistance	237.572 pixels
Circle_3	Present
LeftDistance	154.004 pixels
Circle_4	Present
BottomDist.	173.636 pixels
RightDist.	152.623 pixels
Edge_1	Present
Edge_2	Present
TopAngle	150.074°
Circle_5	Present
Circle_6	Present

Intuitive, Easy to Use

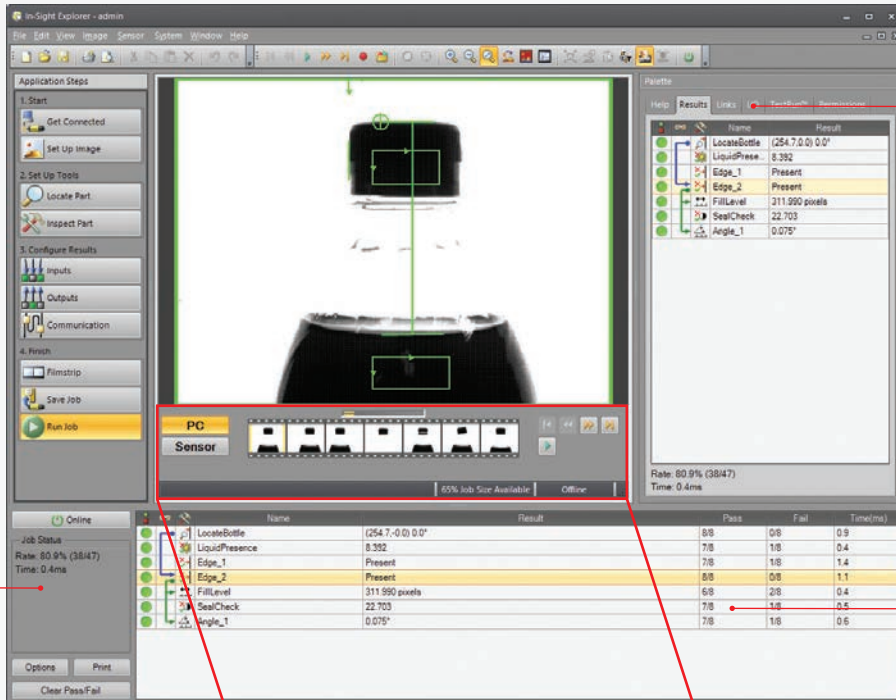

Working from an image of the part, four simple steps complete the application setup:

- 1 START** Connect your In-Sight vision system on your network and set up the image to inspect.
- 2 SET UP TOOLS** Locate and inspect the part using a library of over 40 industry proven vision tools.
- 3 CONFIGURE RESULTS** Point-and-click setup for inputs, outputs, and communication to PLCs, robots and HMIs.
- 4 FINISH** Choose the images to record while inspecting, and put your In-Sight vision system online.

That's all it takes to complete an application! In a fraction of the time that you would normally spend learning how to set up a vision system, you can have your entire solution configured and deployed.

Vision Has Never Been Easier

Run-Time View

I/O Tab allows the user to monitor the input and output signals.

Results table consolidates tool results for easy viewing and helps users understand tool references and performance timing.

Job Status displays the pass rate and run time for the project.

- The Filmstrip enables users to understand how their vision tools perform and to even troubleshoot manufacturing line issues.
- Recording up to 10,000 images to a PC—sorted by pass/fail results—provides robust process metrics on how vision tools will perform over time in changing conditions and boosts reliability when deploying vision to the line.
- Recording images directly to the vision system allows operators and technicians to understand why parts are passing or failing in real time, without halting the vision system.

Powerful Vision Tools

The industry-leading Cognex vision tool library provides reliable, repeatable performance in even the most challenging vision applications. Regardless of the application, In-Sight vision tools have the reliability and accuracy that is required to solve even the most difficult applications.

Tool Category	Advantages	Applications
PART LOCATION TOOLS... LOCATE PARTS IN WIDELY-VARYING CONDITIONS RELIABLY AND ACCURATELY		
	<ul style="list-style-type: none"> • PatMax, the industry's accuracy and reliability standard for part and feature location, utilizes patented geometric pattern matching technology to locate parts under difficult conditions • Simplifies mechanical fixturing and lighting, making vision projects easier and less expensive to implement 	<ul style="list-style-type: none"> • Locate automotive, electronic, pharmaceutical and consumer parts and assemblies for inspection • Identify locations of parts for robotic handling, tolerating changes in rotation, scale and lighting variations • Precision part alignment
INSPECTION TOOLS... VERIFY THE CORRECT ASSEMBLY OF COMPONENTS AND FIND FLAWS IN PART APPEARANCE		
	<ul style="list-style-type: none"> • Provides robust, repeatable inspection results despite changes in part orientation • Allows users to easily classify defects by defect type 	<ul style="list-style-type: none"> • Verify correct assembly of automotive parts • Verify the contents and seals of packaged goods for food, consumer and pharmaceuticals • Inspect correct assembly of electronics
MEASUREMENT TOOLS... MEASURE CRITICAL PART DIMENSIONS AND VERIFY TOLERANCES		
	<ul style="list-style-type: none"> • Enables high-accuracy gauging of critical part dimensions despite changes in part orientation and lighting • Built-in geometry tools make complex measurements easy 	<ul style="list-style-type: none"> • Measure and verify tolerances of automotive parts, assemblies and product labels • Measure critical tolerances of medical and surgical devices
ROBOT GUIDANCE TOOLS... ELIMINATE PART FIXTURING		
	<ul style="list-style-type: none"> • Combines part location tools with communication protocols for total guidance capability • Eliminates costly fixtures in pick-and-place applications • Allows processing multiple part types at the same robotic station 	<ul style="list-style-type: none"> • High-speed precision pick-and-place. Place or remove parts on pallets • Locate unfixtured parts on conveyor and place them in package • Use robot to manipulate part or camera to inspect critical features of part
FLEXIBLE FLAW DETECTION... FIND EDGE AND SURFACE DEFECTS		
	<ul style="list-style-type: none"> • Ability to flex • Allows for process variations reducing false defects • Ignores defect during run time • False defects can be ignored and can be added to the mask 	<ul style="list-style-type: none"> • Edge-based and surface (area) based inspection in one tool • Find edge and surface defects • Find boundary defects – conformity of shape • Find surface defects – stains and scratches • Find print inspection – silk screen logos

Powerful Vision Tools

Tool Category	Advantages	Applications
INSPECT EDGE TOOL		
	<ul style="list-style-type: none"> • Provides robust, repeatable inspection results despite changes in part orientation • Allows users to easily classify defects by defect type controlling thresholds that define a defect • Works on straight or circular parts • Determines min/max deviations and widths • Helps to find gaps in addition to defects 	<ul style="list-style-type: none"> • Verify the correct assembly of components and find flaws in part appearance • Find deviations in edge position and defects and gaps with position and width • Find width variations or missing beads along the bead path in bead tracking applications
COLOR VISION TOOLS... INSPECT AND IDENTIFY PARTS BASED ON COLOR		
	<ul style="list-style-type: none"> • The powerful ExtractColor tool learns simple or complex colors for color based inspection, location, and identification applications • 24-bit resolution MatchColor tool reliably distinguishes between even subtle shade differences • Point-and-click color training with simple adjustments make color application development easy • External retraining enables color retraining on the factory floor without a PC 	<ul style="list-style-type: none"> • Identify and sort products based on their color • Monitor part color to ensure consistent quality • Identify labels to ensure proper labeling of products • Verify assembly of products based on the colors of components • Inspect pharmaceutical blisterpack for the correct color tablets • Verify color and proper assembly of LEDs
ADVANCED OCV/OCR TOOLS... READ AND VERIFY ALPHANUMERIC TEXT STRINGS		
	<ul style="list-style-type: none"> • OCRMax™ achieves higher read rates • Easier to use with unique auto-tune feature • Handles low contrast characters as well as unevenly spaced characters 	<ul style="list-style-type: none"> • Read or verify date/lot codes and SKUs of food and beverage, pharmaceutical, tobacco and consumer items • Verify character legibility and proper printer operation • Read direct-marked numbers and characters on automotive components
INDUSTRIAL CODE READING TOOLS... RELIABLY READ 1-D AND 2-D CODES ON LABELS OR DIRECTLY MARKED ON PARTS		
	<ul style="list-style-type: none"> • 1DMax™ is a fast, accurate, best-in-class 1-D barcode-reading tool • 2DMax™ handles low-contrast, poorly formed 2-D codes resulting from process degradation and marking techniques such as dot peen and laser etch • Reads up to 7200 parts per minute 	<ul style="list-style-type: none"> • Read direct-marked 2-D codes on automotive, aerospace and pharmaceutical parts • Read and track 1-D and 2-D codes, and verify print quality to industry standards for consumer, food, beverage and pharmaceutical products
NON-LINEAR CALIBRATION FOR THE MOST ACCURATE RESULTS		
	<ul style="list-style-type: none"> • Non-Linear Calibration improves accuracy and repeatability by correcting lens and perspective distortion • Step-by-step wizard makes calibration simple, guiding users through the process of turning pixels into robot or real world coordinates • Maintain accuracy even when the vision system is mounted off-axis 	<ul style="list-style-type: none"> • High-accuracy robotic pick-and-place for standard mounting and off-axis mounting due to space constraints or robot motion constraints • High-accuracy dimensions of critical measurements of medical devices

In-Sight Track & Trace for Healthcare

Ready for Serialization

The GS1 HUG™ (Global Healthcare User Group) “strongly recommends investing in camera-based” systems for automatic identification. But as healthcare product manufacturers preparing for the coming global traceability standards already know, a successful transition to mass serialization of product packaging involves more than simply reading a barcode on a label; all of the data on the label must be verified for accuracy.

In-Sight Track & Trace™ is up to the challenge.

Complete Identification and Data Verification Solution

In-Sight Track & Trace works with networked In-Sight vision systems to create a complete identification and data verification solution for serialized labels on pharmaceutical and medical device packaging. Whether you’re looking for a standalone label inspection system, in the early stages of planning your traceability initiative, or you have active serialization projects, In-Sight Track & Trace can meet your needs today and equip you for tomorrow’s requirements.

- Reads 2-D and 1-D barcodes, including Data Matrix, GS1-128, GS1 DataBar and Pharmacode
- Verifies correct ID code contents, including compliance with the GS1 Healthcare data standard
- Assesses Data Matrix code quality at runtime to detect print degradation
- Displays full color images, with graphic overlays and operator controls
- Verifies the accuracy of printed text
- Detects label misalignment and skew
- Provides a standard operator interface across enterprise

In-Sight Track & Trace is compatible with most In-Sight Micro and 5000 series vision systems, allowing you to match the resolution and processing speed to the demands of your line. With dozens of models available, there’s an In-Sight vision system to meet the price/performance requirements of any serialization application.

In-Sight Track & Trace provides a new approach to traceability that’s less expensive to install, less complex to validate, and less costly to maintain. Because it can be combined with a variety of third party products, pharmaceutical manufacturers have the flexibility to customize and scale their serialization solutions to best suit their budgets and needs.

Ready for 21 CFR Part 11 Validation

In-Sight Track & Trace provides the technical controls needed for FDA 21 CFR Part 11 validation, including secure user authentication and support for automatic audit trail generation. Multi-level permissions can be configured to limit users’ access to only the controls for which they are authorized. Plus, the compact, all-in-one In-Sight “smart camera” systems are easier to maintain and validate for Part 11 compliance than most Microsoft Windows® PC-based vision systems.

Easy to Integrate, Easy to Use

A touch screen friendly user interface makes In-Sight Track & Trace easy to configure and operate. Developers can integrate the In-Sight Track & Trace interface into a PC-based HMI or custom application using the included Cognex HMI Display Control for .NET. For a ready-to-deploy solution, In-Sight Track & Trace can also be controlled using the Cognex VisionView® 700 Operator Interface panel or VisionView PC software.

The In-Sight Track & Trace user interface is easily integrated into PC-based HMIs and custom applications using the Cognex HMI Display Control for .NET.

Flexible Display Options: VisionView

VisionView Features:

- Four model options
- Automatic detection of any Cognex system on your network
- Works with In-Sight vision systems and DataMan® industrial ID products from Cognex

Flexible Display Options

VisionView operator interface is ideal for monitoring and controlling vision systems and industrial ID readers on the factory floor, and allows operator controls specific to the application.

VisionView Application Software

The VisionView application software runs on all three platforms of VisionView offered from Cognex and offers the following features:

- **Automatic detection.** VisionView will automatically detect any Cognex vision system on your network.
- **Mix and match Cognex In-Sight systems.** VisionView allows you to view up to twelve In-Sight vision systems in a tiled view.
- **Graphical interface.** VisionView displays full color images, with graphic overlays and operator controls.
- **Fast image updates.** VisionView provides the most recent inspection images so you can view your process in real-time.
- **Access to CustomViews.** The operator controls created in the spreadsheet automatically appear in VisionView.
- **EasyView display.** Items selected from In-Sight EasyBuilder interface software will appear on the VisionView screen, with impressive ease of use.
- **Run-time ability to train fonts, without a PC.** No downtime is required during changeovers. Ideal for OCR/OCV applications.

Multiple Platforms

Cognex offers four platforms of VisionView to choose from:

1. VisionView PC Software

Monitor and control the vision application with the VisionView interface on a PC. This provides the flexibility of different display sizes. Choose your own PC and run VisionView directly on your existing machine... no additional hardware is required!

2. VisionView Operator Interface Panel

VisionView 900 is a powerful, low-cost operator interface panel that provides password-protected user control to adjust vision tool parameters and regions of interest without requiring a PC on your factory floor.

- Nine-inch touch screen gives total control during run-time operation.
- Four Ethernet ports connect to multiple vision systems simultaneously.
- One LAN port allows you to temporarily connect a PC for setup or use with an external switch to connect up to eight additional cameras (total of twelve connected cameras).

3. VisionView VGA

Monitor and control the vision application with the VisionView interface via a VGA connection. This provides the flexibility to connect smaller- or larger-size monitors for "control room" viewing of images, results, CustomViews, and EasyViews. The VisionView VGA supports VGA displays of different resolutions, as well as touch screen displays.

4. VisionView CE-SL for Third Party CE Panels

License a version of the VisionView software that can run on Rockwell PanelViewPlus, Siemens MP-Series and Advantec CE Panels. Use your existing CE panels and save your valuable space. There is no longer a need to install new monitors.

Flexible Display Options

Customized Visualization and Control

From CustomViews integrated directly into the In-Sight Explorer software environment, to ActiveX controls for integration into third-party HMI systems, to custom-built standalone applications, Cognex provides a full suite of tools for users needing highly customized operator interfaces.

In-Sight Explorer CustomView

Integrated into the In-Sight Explorer software, the CustomView allows sophisticated operator interaction to be configured in the vision application. Graphical controls such as indicator lights, buttons, data displays and entries, trend charts and message boxes are placed in the spreadsheet view to create the operator display. The CustomView is also designed to be displayed automatically on VisionView.

The CustomView interface is created easily, and is a cost-effective way to monitor single or networked In-Sight vision systems from a PC.

In-Sight Software Development Kit

A highly customized, standalone user interface can be tailored to your exact needs using the In-Sight Software Development Kit. This package provides the ultimate level of flexibility via programmatic methods for viewing data and images, changing parameters, and loading new jobs or recipes.

In-Sight Display Control

Integrating data and images from an In-Sight vision system into third-party, Windows-based HMI software is quickly achieved using the In-Sight ActiveX Display Control. Tested with the most common HMI software packages, the Display Control integrates the vision experience into the rest of the machine control with drag-and-drop simplicity.

A Full Range of Accessories

To simplify and complete system integration, Cognex offers a variety of optional accessories designed specifically for use with In-Sight vision systems.

Lighting

LED array provides economical bright light for many applications.

In order to achieve the highest quality images possible, Cognex offers a wide array of lighting accessories. When basic lighting works for the application, integrated ring lights are ideal for In-Sight vision systems. Easily mounted directly to the vision system, these lights provide basic front lighting without having to purchase and install a separate light. Integrated ring lights are available in red LEDs, red diffuse LEDs and white LEDs.

Lenses

Cognex offers a full range of high-quality compact lenses designed specifically for machine vision applications.

And, for In-Sight ID models, image formation systems are available in seven different lens focal lengths.

Cables

In-Sight cables provide superior performance with rugged, stainless steel M12 connectors and are rated for ten million linear and thirty thousand torsional flex cycles... ideal for robot-mounted applications.

VisionView Operator Interface

VisionView operator interface is ideal for monitoring and controlling vision systems and industrial ID readers on the factory floor, and allows operator controls specific to the application. Available in multiple platform options. See page 15.

I/O Modules

In-Sight I/O modules are designed to simplify connections and expand the I/O capabilities of In-Sight vision systems.

They allow easy access to power, acquisition triggers and light strobe, and provide convenient general-purpose input and output wiring. Rugged quick-connect cables ensure reliable connections to the In-Sight vision system.

Additionally, I/O modules provide an RS-232 communications port for serial devices.

Your Cognex sales engineer or certified Cognex partner can provide information on these and other accessories that enhance In-Sight vision systems.

In-Sight 7000 Specifications

In-Sight 7000 Series

Model ¹	Speed Rating ²	Acquisition ³ (fps)	Resolution		User Interface		Supported Tools ⁴							Part Number

Notes:

- 1) In-Sight 7000 has four high speed input and four high speed output built in. I/O modules are available for additional I/O.
- 2) Speed rating compared to In-Sight Micro 1020 model and does not include image acquisition rate. The 5604 and 5614 models have acquisition speed rated in lines per second.
- 3) Acquisition rate is based on minimum exposure, and a full image frame capture.
- 4) Supported Tools:
 - B** Base tool set includes brightness, contrast, pattern, edge, point-to-point geometry, distance, angle, plot and blob tools.
 - E** Essential Tool Set includes blob, edge, curve and line finding, histogram and geometry tools, image filters, pattern matching, and standard calibration.
 - X** Extended Tool Set includes non-linear calibration, caliper, Flaw Detection and InspectEdge tools.
 - I** ID tool set includes: 1-D/2-D barcode reading and verification, text reading and verification (OCR/OCV) and image filters.
 - C** Color tool set includes MatchColor, ExtractColor, color histogram, color to greyscale filters and color to greyscale distance filter. Exception: In-Sight 7010C has Color ID tool only.
 - P** Includes PatMax, Cognex patented geometric pattern matching technology. PatMax is required for Flexible Flaw Detection Tool.
 - O** Tools for OCR applications.
